

## Simplify IT lifecycle management and strategic planning.

Zones Discovery Services (ZDS) leverage a simple, non-intrusive, agentless technology designed to provide IT infrastructure insight, discovery, and analytics. ZDS will rapidly discover all hardware and software assets at every IP address in your environment – regardless of operating system.

There are two ways to deploy ZDS: We can run a one-time analysis and report on the status of your infrastructure, or deliver ongoing services that include multiple benefits.

### Zones Discovery Services Family of Products

#### Zones Discovery Services Proof of Concept (30 Day)

##### > Full ITAM Discovery

- Windows
- OSX and Mac OS
